CAREER OBJECTIVE

Innovative Computer Science undergraduate and **Full-Stack Developer** experienced in building scalable, AI-integrated software systems. Adept at utilizing **Python, React, Django, and PostgreSQL** to develop robust applications, deployed seamlessly via **Docker** containerization. Passionate about solving complex engineering challenges, writing maintainable code, and contributing to dynamic teams to deliver data-driven digital products.

PROJECTS

TicketHub AI - Smart Support System | GitHub
React, Django REST Framework, PostgreSQL, Docker, Google Gemini AI

- Developed a containerized full-stack IT support platform, seamlessly connecting a dynamic React frontend with a Django backend using Docker Compose.
- Engineered a real-time auto-classification feature by integrating the Google Gemini 2.5 LLM via direct REST API calls, including graceful network fallback mechanisms.
- Optimized dashboard analytics utilizing advanced Django ORM aggregations (Count, Min, Max) and enforced strict data integrity through PostgreSQL database-level constraints.

Hotel Management System | GitHub
Vanilla JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, JSON Server (REST API)

- Engineered a responsive, single-page application (SPA) style interface using HTML5, CSS3, and Bootstrap 5, featuring a dynamic user booking flow and smart date-search filtering.
- Implemented complex client-side business logic using modern Vanilla JavaScript, leveraging the Fetch API for async network requests and localStorage for secure session management.
- Developed a comprehensive Admin Portal with real-time occupancy tracking, integrating RESTful API calls to a Node.js JSON Server for seamless data manipulation across bookings and inventory.

Virtual Fitting Room with Pose Detection | GitHub
Python, OpenCV, MediaPipe, VITON-HD

- Engineered a virtual try-on system utilizing computer vision and pose detection to accurately map garment overlays to human poses.
- Optimized system performance to enhance realism and provide a seamless, interactive user experience.

EXPERIENCE

Android Developer Intern | India Edu Community by Google Developers *Mar 2024 – Apr 2024*

- Designed and implemented responsive UI layouts for Android applications, ensuring consistent interfaces across multiple devices.
- Managed activity lifecycles and optimized UI event handling to deliver a smooth and performant user experience.

Salesforce Administrator Intern | AICTE NEAT Cell & SmartBridge *May 2024 – Jun 2024*

- Completed an 8-week intensive virtual program focused on CRM automation, data management, and business process visibility.
- Built automated workflows, custom reports, and dynamic dashboards across Sales and Service Cloud modules.

EDUCATION

B.Tech – GITAM Deemed to be University ***2021 – 2025***
Computer Science and Engineering **(CSBS)** – Bengaluru, India **CGPA**: 6.3/10

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend Frameworks: React.js, Tailwind CSS, Bootstrap 5
Backend & Databases: Django, Django REST Framework (DRF), PostgreSQL, SQLite, RESTful APIs
Infrastructure & Tools: Docker, Git/GitHub, Postman, JSON Server
AI & Computer Vision: Google Gemini API, OpenCV, YOLOv5, MediaPipe

CERTIFICATIONS

- AI/ML Intern – India Edu Community by Google Developers
- MatLab OnRamp Certification
