

CAREER OBJECTIVE

Forward-thinking Product Operations Analyst and Associate Product Manager with a strong technical foundation in full-stack architecture. Adept at bridging the gap between engineering teams and business goals to deliver scalable, data-driven digital products. Experienced in CRM automation, building dynamic dashboards, and optimizing user workflows to enhance the overall product experience.

EXPERIENCE

Salesforce Administrator Intern | AICTE NEAT Cell & SmartBridge *May 2024 – Jun 2024*

- Streamlined business process visibility and data management through an intensive 8-week CRM automation program.
- Designed and implemented automated workflows, custom reports, and dynamic dashboards across Sales and Service Cloud modules to drive data-informed decision-making.

Android Developer Intern | India Edu Community by Google Developers *Mar 2024 – Apr 2024*

- Managed UI design and activity lifecycles to deliver a seamless, responsive user experience across multiple device formats.
- Collaborated on interface consistency, ensuring the final product met design and usability standards.

PROJECTS

TicketHub AI - Smart Support System | [GitHub](#)

- Designed and managed a comprehensive IT support platform, connecting a React frontend with a Django backend to streamline user support workflows.
- Integrated Google Gemini AI to engineer a real-time auto-classification feature, significantly reducing manual ticket triaging and improving response times.
- Built dashboard analytics leveraging advanced database aggregations to track platform performance, issue resolution rates, and user engagement metrics.

Hotel Management System | [GitHub](#)

- Designed a single-page application (SPA) featuring a dynamic user booking flow and smart date-search filtering to optimize the customer journey.
- Built a comprehensive Admin Portal with real-time occupancy tracking, enabling seamless inventory and booking management for business stakeholders.

Virtual Fitting Room | [GitHub](#)

- Engineered an interactive try-on system utilizing computer vision to enhance realism, directly improving product visualization and the end-user experience.

TECHNICAL & PRODUCT SKILLS

- Product & Workflow Tools:** Salesforce (Sales/Service Cloud), CRM Automation, Dashboards, Postman, Git/GitHub.
- Data & Analytics:** PostgreSQL, SQL, Data Management, Advanced ORM Aggregations.
- Languages & Frameworks:** Python, JavaScript (ES6+), React.js, Django, HTML5, CSS3.
